Specifications

Reach Truck

ESR 5200 Series

Specifications

General Information	1.1	Manufacturer	Crown Equipment Corporation				
	1.2	Model			ESR 5220-1.4	ESR 5240-1.4	
	1.3	Power			electric		
	1.4	Operator Type			sit down		
	1.5	Load Capacity		Q	t	1.4	1.4
	1.6	Load Centre		c	mm	600	
	1.8	Load Distance	mast extended	x	mm	202	187
	1.8a		mast retracted	x1	mm	see table of dimensions 6	see table of dimensions 7
	1.9	Wheel Base		y	mm	1380	1380
Weights	2.1	Weight	less battery		kg	1915 [▲]	2055 ^{▲▲}
	2.4	Axle Load	reach extended		kg	see table of dimensions 3	
	2.5		reach retracted		kg	see table of dimensions 3	
Tyres	3.1	Tyre Type	D/L			Vulkollan	
	3.2	Tyres	front		mm	343 x 140	
	3.3		rear		mm	285 x 80	285 x 100
	3.5	Wheels	no. (x=driven) front/rear			1x / 2	
	3.7	Track Width	rear	b11	mm	see table of dimensions 2	
Dimensions	4.1	Tilt	forward / backward	angle	°	1 / 3	
	4.2	Mast	collapsed height	h1	mm	see table of dimensions 4	
	4.3	Free Lift	w.o. load backrest	h2	mm	see table of dimensions 4	
	4.4	Lift Height		h3	mm	see table of dimensions 4	
	4.5	Mast	extended height, w.o. lbr	h4	mm	see table of dimensions 4	
	4.7	Overhead Guard Height		h6	mm	2175	
	4.8	Seat Height	compressed	h7	mm	1125	
	4.10	Outrigger Height			mm	312	301
	4.15	Lowered Fork Height		h13	mm	40	
	4.16	Head Room	overhead guard		mm	1034	
	4.20	Headlength		l2	mm	see table of dimensions 6	see table of dimensions 7
	4.21	Overall Width		b1/b2	mm	1120	1285
	4.22	Fork Dimension		th	mm	38	
				wxl	mm	100 x 1145	
	4.23	Fork Carriage	ISO class		mm	2 A	
	4.24	Fork Carriage Width	without sideshift / with sideshift	b3	mm	830 / 770	
	4.25	Width Across Forks		b5	mm	see table of dimensions 2	
4.26	Inside Straddle		b4	mm	see table of dimensions 2		
4.28	Reach		l4	mm	see table of dimensions 6	see table of dimensions 7	
4.32	Ground Clearance	centre wheelbase	m2	mm	76		
4.33	Working Aisle Width	1000x1200 travers	Ast	mm	see table of dimensions 6	see table of dimensions 7	
4.34		800x1200 length	Ast	mm	see table of dimensions 6	see table of dimensions 7	
4.35	Turning Radius		Wa	mm	1638	1645	
4.37	Length Over Outriggers		l7	mm	1800	1785	
Performance	5.1	Travel Speed *	w./w.o. load		km/h	10.0 / 10.0	
	5.2	Lift Speed	w./w.o. load		m/s	0.4 / 0.6	
	5.3	Lower Speed	w./w.o. load		m/s	0.5 / 0.5	
	5.4	Reach Speed	w./w.o. load		m/s	0.18 / 0.18	
	5.7	Max. Gradeability	w./w.o. load		%	12 / 12	
	5.10	Service Brake				regenerative electric	
Motors	6.1	Traction Motor	60 min. rating		kW	6.8	
	6.2	Lift Motor	15% on time		kW	7.9	
	6.3	Max. Battery Box Size		lxhwxw	mm	see table of dimensions 1	
	6.4	Battery Voltage	nominal capacity 5 h rating		V/Ah	48 / see table of dimensions 1	
	6.5	Battery Weight			kg	see table of dimensions 1	
	6.7	Battery Tray Height	w./w.o. rollers		mm	303	
Misc.	8.1	Type of Controller	drive / lift / steer			transistor	
	8.2	Available Working Pressure for Attachments			bar	210	
	8.4	Noise Level			dB(A)	65

Narrow outriggers (1070 mm inside)			⑩	

* Included in High Level Performance System

① Lift heights ≤ 7500 mm

② Lift heights > 7500 mm

③ Not available with 5th hydraulic function

④ Stops forks above outriggers if mast is retracted

⑤ Standard or T-shape battery

⑥ 2000 kg only - Standard or T-shape battery

⑦ Not with Coldstore Cabin

⑧ 1600 and 2000 kg only

⑨ Only as part of High Level Performance System

⑩ 1600 kg only, not with 420-465 Ah battery, lift height ≤ 9450 mm

Driver's Compartment and Controls

A comfortable low, wide step speeds entry. Well-positioned long tubular overhead guard post works as a grab handle.

Non-slip floor mat ensures safe and comfortable footing during entry and exit.

Once seated, the operator has the ability to tailor the compartment to "fit". A high quality comfortable seat can be adjusted for the operator's weight. In addition, the seat can be adjusted laterally, as well as for the angle of the backrest.

These adjustments ensure a comfortable position for any operator. The left foot rests on the operator "presence" pedal. The right foot operates an automotive style accelerator and brake pedal arrangement.

The travel direction switch is actuated with the right thumb leaving the fingers of the right hand free to operate all the hydraulic controls.

Hydraulic controls allow for easy blending of functions.

There are four easily accessible storage compartments. The padded armrest is designed particularly with wrist support in mind.

The display contains information on the truck's operating status, battery discharge indicator, travel direction indicator, steer tyre position indicator, hour meters for various truck operations, performance profile selection and service information for planned maintenance scheduling, fault finding and testing. The information display serves as the PIN input to employ the on-board user code system thereby preventing unauthorised use. The LCD display is well illuminated for excellent visibility.

Integrated Control System with Access 1 2 3®

Crown's Integrated Control System provides unmatched truck control for all primary truck systems:

- Traction motor control
- Hydraulic valve and motor control
- Steer motor control
- Braking
- Information/diagnostic display

Dedicated motor controllers are employed to simplify troubleshooting and minimise

replacement cost. All systems are linked through CAN-Bus, which greatly simplifies wiring while improving diagnostic communication.

Crown's Access 1 2 3 Diagnostics is the most comprehensive fault detection system in the industry. A trained technician can actively view inputs and outputs during truck operation thereby significantly reducing search and downtime. All operator information such as travel and hydraulic parameters, truck monitors, etc. can be obtained and adjusted via the display. No handset or laptop is required – all functions are on-board and easy to use.

Three programmable performance profiles can be selected on the display. These pre-sets allow you to quickly adjust traction and hydraulic parameters to suit application requirements.

Traction System

Selected travel speed remains constant regardless of surfaces, load weight or grades. The travel speed, acceleration, and electric braking ratio can be programmed via the display, facilitating the best possible productivity and energy consumption for each application.

Operators gain confidence and improve performance with Crown's intelligent Optimised Cornering Speed. During cornering OCS recognises whether the operator is driving into or out of a curve, with the system analysing steer tyre angle, driving direction and steering direction. It then automatically adjusts speed and acceleration for maximum safe performance.

Hydraulic System

The control system for the hydraulic pump motor and proportional valves facilitates precise and sensitive execution of all hydraulic functions. All hydraulic parameters such as lift, lower, tilt, side shift, and reach speeds are fully adjustable and can therefore be adapted to different applications.

Three hydraulic functions (lift/lower, tilt, reach) are standard on the ESR 5220 and 5240. A fourth function (side shift) is standard on the ESR 5260 and 5280S and optional on the ESR 5220 and 5240. A fifth function can be added to the ESR 5260 and 5280S for accessory control.

Hydraulic hoses are internally reeved through the mast. The internal gear pump reduces the noise level and ensures high efficiency in all applications. The hydraulic oil is filtered twice. The return and suction filters can be exchanged without draining the hydraulic tank.

Moving mast and reach carriage

Crown's unique offset, wide view mast delivers excellent visibility at height as well as for low-level operations. Mast cross-bracing and overhead guard bracing have been angled, and hose and chain rollers have been canted to further enhance visibility. A load backrest designed for maximum visibility is also standard.

The ESR 5220 and 5240 features a range of duplex and triplex masts with limited or full free lift. Tilting masts reduce head length and are ideal for tight aisle widths. The tilting mast also compensates for uneven floors and is the choice when loading at medium heights on unlevelled ground.

The ESR 5260 and 5280S feature heavy duty triplex masts with full free lift, integrated side shift and tilting fork carriage. Mast channels are reinforced to minimise static and dynamic deflection when storing heavy loads at tall lift heights.

Spring dampers are located on the fork carriage to reduce noise while staging. Elastomer dampers between the mast stages and hydraulic dampening in the free lift cylinder reduce noise while lowering.

The anti-friction mast rollers are canted to reduce energy consumption and ensure longer life. The heavy-duty reach carriage moves on four main roller bearings. Two adjustable backing rollers minimise dynamic mast rocking while four adjustable side rollers/slides ensure very smooth movement and precise positioning.

Drive unit

A highly efficient drive unit with helical gears, integrated pinion and vertically mounted 3-phase (AC) traction motor provides quiet, powerful traction performance. The large Vulkollan™ drive wheel offers high load capacity, long life, and excellent travel comfort.

Steering

Advanced AC steering system featuring 360 Select™ control system that allows the operator to choose between 180° and 360° steer tyre rotation to match driving conditions, experience level or personal preference. The system can be locked in either mode with password-protected access. A fail-safe control circuit applies motor braking and parking brake if a fault is detected.

Brakes

A foot pedal applies the service brake. Crown's e-GEN braking system uses the torque of the drive motor to stop and hold the truck. On the ESR 5260 and 5280S braking force is also distributed to the load wheels.

The truck can also be brought to a stop by reversing the travel direction using the electric regenerative plugging function. On ramps, or when interfacing with push back racking, the selectable Truck-Hold feature electronically brakes the truck when the accelerator is released. The operator does not have to apply the brake, improving comfort and control in these applications.

The parking brake is activated by a switch in the operator compartment. The spring-applied/electric release brake is applied on the drive wheel. The parking brake is automatically activated when the operator exits the truck.

Motors

The Crown manufactured 3-phase (AC) motors deliver high torque and seamless reversal. Traction and hydraulic motors are oversized for superior thermal capability and are especially suitable for high loads and high ambient temperature applications.

Safety Regulations

Conforms to European safety standards. Dimensions and performance data given may vary due to manufacturing tolerances. Performance is based upon an average size vehicle and is affected by weight, condition of truck, how it is equipped and the conditions of the operating area. Crown products and specifications are subject to change without notice.
